DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-4, in the reply filed on 06/10/05 is acknowledged.

Information Disclosure Statement

2. The information disclosure statement filed 04/06/04 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. The US Patent Documents have been considered, however, no other references on the 1449 were considered due to lack of copies of these references.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Passafiume (4,279,369) in view of Pfaff, Jr. (6,085,626). Passafiume discloses first roll 12; first roll axis at the center of roll 12; second roll 14; second roll axis at the center of the second roll; first cutting blade 16; second cutting blade 18; first abutment 26; second abutment 28; periphery is the outside surface of the roll; synchronizing means 22, 24; first rib 16, 28; second rib 18, 28; width of the edges of the first and second cutting blades is the length of face 51 in figure 5; width of first and second abutment is the length of 57 and 60 in figure 5. Passafiume discloses everything

Art Unit: 3724

as noted above but does not disclose a distance setting means, however, Pfaff, Jr. teaches distance setting means 118. It would have been obvious to provide a distance setting means in Passafiume as taught by Pfaff, Jr. in order to prevent the cutting blades from interfering with one another. Note that radii of the contact peripheries 118 are larger than the rolls in column 4, lines 18-30 in Pfaff, Jr.
